Booty Builder

Model 7.0

The Booty Builder® is a new and innovative machine which makes hip-thrusting safer, faster and better.

Compact design

Eliminates the need for gym members to occupy benches, barbells, plates and floor space. The innovative design makes it possible to place it close to a side wall, or into a tight corner space.

Better

You are doing an optimal range of motion and movement for targeting the gluteus maximus when exercising on the Booty Builder®.

Faster

It takes less time training on the Booty Builder® than setting up for a barbell hip thrust.

If you want to buy the Booty Builder® machine, products, or you have any questions, please contact us at: info@bootybuilder.com
